1. Executive Summary

Introduction and Methodology

- 1.1 The primary objective of this Gypsy and Traveller Accommodation Assessment (GTAA) is to provide a robust assessment of current and future need for Gypsy, Traveller and Travelling Showpeople accommodation in North Somerset Council (the Council).
- 1.2 As well as updating previous GTAAs, the GTAA provides a credible evidence base which can be used to aid the implementation of Local Plan Policies and, where appropriate, the provision of new Gypsy and Traveller pitches and Travelling Showpeople plots for the 20-year period 2022 to 2042 to meet the 15-year requirement set out in the Planning Policy for Traveller Sites (PPTS) and to meet the new North Somerset Local Plan period to 2038. The outcomes of this study supersede the outcomes of any previous GTAAs for North Somerset Council.
- 1.3 The GTAA has sought to understand the accommodation needs of the Gypsy, Traveller and Travelling Showpeople population in North Somerset through a combination of desk-based research, stakeholder interviews, and engagement with members of the Travelling Community living on all known sites, yards, and encampments.
- 1.4 A total of 96 interviews or proxy interviews were completed with Gypsies and Travellers living on sites in North Somerset and 5 interviews or proxy interviews were completed with Travelling Showpeople. Despite all of the efforts that were made it was not possible to identify any households living in bricks and mortar to complete an interview with.
- 1.5 The review of the baseline data and any new fieldwork for the study was completed between June 2021 and January 2022, and the baseline date for the study is January 2022.

Key Findings

- 1.6 Overall, the pitch needs for Gypsies and Travellers for the period 2022-2042 are set out below. Needs are set out for those households that met the planning definition of a Gypsy or Traveller; for any undetermined households¹ where an interview was not able to be completed due to households not being present despite up to three visits to each site who may meet the planning definition; and for those households that did not meet the planning definition – although this is no longer a requirement for a GTAA.
- 1.7 Only the need from those households who met the planning definition and those from undetermined households who subsequently demonstrate that they meet it should be formally considered as need arising from the GTAA. The need arising from households that met the planning definition should be addressed through site allocation/intensification/expansion Local Plan Policies as appropriate.
- 1.8 The Council will need to carefully consider how to address any need associated with undetermined Travellers as it is unlikely that all this need will have to be addressed through the

¹See Paragraph 3.28 for further information on undetermined households.

provision of conditioned Gypsy or Traveller pitches. In terms of Local Plan Policies, the Council should consider the use of a criteria-based policy (as suggested in PPTS) for any undetermined households, as well as to deal with any windfall applications, and need from bricks and mortar.

- 1.9 In general terms, the need for those households who did not meet the planning definition will need to be addressed as part of general housing need and through separate Local Plan Policies. This approach is specifically referenced in the revised National Planning Policy Framework (July 2021). Paragraph 61 of the NPPF sets out that in determining the minimum number of homes needed, strategic plans should be based upon a local housing need assessment conducted using the standard method in national planning guidance. Paragraph 62 then states that [emphasis added] *‘Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, **travellers**, people who rent their homes and people wishing to commission or build their own homes’*. The footnote to this section states that *‘Planning Policy for Traveller Sites sets out how travellers’ housing needs should be assessed for those covered by the definition in Annex 1 of that document.’*
- 1.10 The findings of this report should be considered as part of future housing mix and type within the context of the assessment of overall housing need in relation to Gypsies, Travellers and Travelling Showpeople. Whilst the findings in this report are aggregated totals for the whole of North Somerset due to data protection issues, the Council have more detailed data to support the preparation of any future Local Plan Policies.

Gypsies and Travellers

- 1.11 There were 50 Gypsy or Traveller households identified in North Somerset that met the planning definition; 12 undetermined households that may meet the planning definition; and 79 households that did not meet the planning definition.
- 1.12 There is a need for **40 pitches for households that met the planning definition** for the GTAA period to 2042. This is made up of 4 households on unauthorised developments; 15 concealed or doubled-up households or single adults; 7 teenagers who will need a pitch of their own in the next 5 years; and 14 from new household formation², using a formation rate of 1.50% derived from the household demographics. There is also supply from 1 vacant pitch on a public site. The need for the new Local Plan period to 2038 is for 37 pitches.
- 1.13 There is need for up to **9 pitches for undetermined households** for the GTAA period to 2042. This is made up of 4 unauthorised pitches, and 5 pitches from new household formation (using the ORS national formation rate of 1.50%). If the locally derived proportion of households that met the planning definition (39%) were applied, this could result in a need for 4 pitches. If the ORS national average³ of 30% of households that met the planning definition were applied this could also result in a need for 3 pitches. The need for the new Local Plan period to 2038 is for 8 pitches.
- 1.14 Whilst not now a requirement to include in a GTAA, there is a **need for 65 pitches for households that did not meet the planning definition** for the GTAA period to 2042. This is made up of 17 concealed or doubled-up households or single adults; 13 teenagers who will need a pitch of their

² See Chapter 7 for further information on new household formation.

³ Based on over 5,000 interviews completed by ORS across England.

own in the next 5 years; and 27 from new household formation, using a formation rate of 2.00% derived from the household demographics. The need for the new Local Plan period to 2038 is for 57 pitches.

1.15 Figure 1 summarises the identified need and Figure 2 breaks this down by 5-year periods.

Travelling Showpeople

1.16 There were 5 Travelling Showpeople households identified in North Somerset living one 1 yard, all met the planning definition.

1.17 There is a need for **4 plots for households that met the planning definition** for the GTAA period to 2042. This is made up of 1 teenager who will need a plot of their own in the next 5 years; and 3 from new household formation⁴, derived from the household demographics. Need for the new Local Plan period to 2038 is also for 4 plots.

1.18 Figure 3 summarises the identified need and Figure 4 breaks this down by 5-year periods.

Transit Recommendations

1.19 Due to low numbers of short-term encampments it is not recommended that there is a need for formal transit provision in North Somerset at this time.

1.20 The situation relating to levels of unauthorised encampments should continue to be monitored. As well as information on the size and duration of the encampments, this monitoring should also seek to gather information from residents on the reasons for their stay in the local area; whether

⁴ See Chapter 7 for further information on new household formation.

they have a permanent base or where they have travelled from; and whether they have any need or preference to settle permanently in the local area. This information is currently collected as part of a Welfare Assessment (or similar).

- 1.21 In the short-term the Council should continue to use its current approaches when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements could also be considered.
- 1.22 The term 'negotiated stopping' is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent 'built' transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the Council and the (temporary) residents regarding expectations on both sides. See www.negotiatedstopping.co.uk for further information.
- 1.23 ORS also recommend, as part of a strategy to address transit requirements, that the Council engage with neighbouring local authorities to identify what they are currently doing or planning to do to address these needs. Unauthorised encampments are not a problem restricted to North Somerset and this needs to be recognised.
- 1.24 Temporary stopping places can be made available at times of increased demand due to fairs, cultural celebrations and festivals that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.

2. Introduction

- 2.1 The primary objective of this Gypsy and Traveller Accommodation Assessment (GTAA) is to provide a robust assessment of current and future need for Gypsy, Traveller and Travelling Showpeople accommodation in North Somerset Council. The outcomes of the study will supersede the outcomes of the previous Gypsy, Traveller and Travelling Showpeople Accommodation Needs Assessment completed in North Somerset.
- 2.2 The study provides an evidence base to enable the Council to comply with their requirements towards Gypsies, Travellers and Travelling Showpeople under the Housing Act 1985, Planning Policy for Traveller Sites (PPTS) 2015, the Housing and Planning Act (2016), the revised National Planning Policy Framework (NPPF) 2021, and the revised Planning Practice Guidance (PPG) 2021.
- 2.3 The GTAA provides a robust assessment of need for Gypsy, Traveller and Travelling Showpeople accommodation in the study area. It is a credible evidence base which can be used to aid the implementation of Local Plan Policies and the provision of Traveller pitches and plots covering the 20-year period 2022 to 2042 to meet the 15-year requirements of the PPTS and the new North Somerset Local Plan period to 2038. As well as identifying current and future permanent accommodation needs, it also seeks to identify any need for the provision of transit sites or emergency stopping places.
- 2.4 We would note at the outset that the study covers the needs of Gypsies (including English, Scottish, Welsh and Romany Gypsies), Irish Travellers, New (Age) Travellers, and Travelling Showpeople, but for ease of reference we have referred to the study as a Gypsy and Traveller (and Travelling Showpeople) Accommodation Assessment (GTAA).
- 2.5 The baseline date for the study is January 2022 which was when the review of the baseline data and any new interviews were completed.

Definitions

- 2.6 The planning definition for a Gypsy, Traveller or Travelling Showperson is set out in PPTS (2015). The previous definition set out in the Housing Act (2004) was repealed by the Housing and Planning Act (2016).

The Planning Definition in PPTS (2015)

- 2.7 For the purposes of the planning system, the definition was changed in PPTS (2015). The planning definition is set out in Annex 1 and states that:

For the purposes of this planning policy “gypsies and travellers” means:

Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family’s or dependants’ educational or health needs or old age have ceased to travel temporarily, but excluding members of an organised group of travelling showpeople or circus people travelling together as such.

In determining whether persons are “gypsies and travellers” for the purposes of this planning policy, consideration should be given to the following issues amongst other relevant matters:

- a) Whether they previously led a nomadic habit of life.
- b) The reasons for ceasing their nomadic habit of life.
- c) Whether there is an intention of living a nomadic habit of life in the future, and if so, how soon and in what circumstances.

For the purposes of this planning policy, “travelling showpeople” means:

Members of a group organised for the purposes of holding fairs, circuses or shows (whether or not travelling together as such). This includes such persons who on the grounds of their own or their family’s or dependants’ more localised pattern of trading, educational or health needs or old age have ceased to travel temporarily, but excludes Gypsies and Travellers as defined above.

(Planning Policy for Traveller Sites, Department for Communities and Local Government (DCLG), August 2015)

- 2.8 The key change that was made to both definitions was the removal of the term “*persons...who have ceased to travel permanently*”, meaning that those who have ceased to travel permanently will no longer fall under the planning definition of a Traveller for the purposes of assessing accommodation need in a GTAA.

Definition of Travelling

- 2.9 One of the most important questions that GTAA’s need to address in terms of applying the planning definition is *what constitutes travelling?* This has been determined through case law that has tested, among other things, the meaning of the term ‘*nomadic*’.
- 2.10 **R v South Hams District Council (1994)** – defined Gypsies as “persons who wander or travel for the purpose of making or seeking their livelihood (not persons who travel from place to place without any connection between their movements and their means of livelihood.)” This includes ‘born’ Gypsies and Travellers as well as ‘elective’ Travellers such as New Age Travellers.
- 2.11 In **Maidstone BC v Secretary of State for the Environment and Dunn (2006)**, it was held that a Romany Gypsy who bred horses and travelled to horse fairs at Appleby, Stow-in-the-Wold, and the New Forest, where he bought and sold horses, and who remained away from his permanent site for up to two months of the year, at least partly in connection with this traditional Gypsy activity, was entitled to be accorded Gypsy status.
- 2.12 In **Greenwich LBC v Powell (1989)**, Lord Bridge of Harwich stated that a person could be a statutory Gypsy if he led a nomadic way of life *only seasonally*.
- 2.13 The definition was widened further by the decision in **R v Shropshire CC ex p Bungay (1990)**. The case concerned a Gypsy family that had not travelled for some 15 years in order to care for their elderly and infirm parents. An aggrieved resident living in the area of the family’s recently approved Gypsy site sought a judicial review of the local authority’s decision to accept that the family had retained their Gypsy status even though they had not travelled for some considerable time. Dismissing the claim, the judge held that a person could remain a Gypsy even if he or she did not travel, provided that their nomadism was held in abeyance and not abandoned.
- 2.14 That point was revisited in the case of **Hearne v National Assembly for Wales (1999)**, where a traditional Gypsy was held not to be a Gypsy for the purposes of planning law as he had stated

that he intended to abandon his nomadic habit of life, lived in a permanent dwelling, and was taking a course that led to permanent local employment.

- 2.15 **Wrexham County Borough Council v National Assembly of Wales and Others (2003)** determined that households and individuals could continue to lead a nomadic way of life with a permanent base from which they set out from and return to.
- 2.16 The implication of these rulings in terms of applying the planning definition is that it will **only include those who travel (or have ceased to travel temporarily) for work purposes, or for seeking work, and in doing so stay away from their usual place of residence**. It can include those who have a permanent site or place of residence, but that it will not include those who travel for purposes other than work – such as holidays and visiting friends or relatives. It will not cover those who commute to work daily from a permanent place of residence (see APP/E2205/C/15/3137477).
- 2.17 It may also be that within a household some family members travel for nomadic purposes on a regular basis, but other family members stay at home to look after children in education, or other dependants with health problems etc. In these circumstances the household unit would be defined as travelling under the planning definition.
- 2.18 Households will also fall under the planning definition if they can demonstrate that they have ceased to travel temporarily as a result of their own or their family's or dependants' educational, health needs or old age. In order to have ceased to travel temporarily these households will need to demonstrate that they have travelled for work in the past. In addition, households will also have to demonstrate that they plan to travel again for work in the future.
- 2.19 This approach was endorsed by a Planning Inspector in Decision Notice for an appeal in East Hertfordshire (Appeal Ref: APP/J1915/W/16/3145267) that was issued in December 2016. A summary can be seen below.

Case law, including the R v South Hams District Council ex parte Gibb (1994) judgment referred to me at the hearing, despite its reference to 'purposive activities including work' also refers to a connection between the travelling and the means of livelihood, that is, an economic purpose. In this regard, there is no economic purpose... This situation is no different from that of many landlords and property investors or indeed anyone travelling to work in a fixed, pre-arranged location. In this regard there is not an essential connection between wandering and work... Whilst there does appear to be some connection between the travel and the work in this regard, it seems to me that these periods of travel for economic purposes are very short, amounting to an extremely small proportion of his time and income. Furthermore, the work is not carried out in a nomadic manner because it seems likely that it is done by appointment... I conclude, therefore, that XX does not meet the definition of a gypsy and traveller in terms of planning policy because there is insufficient evidence that he is currently a person of a nomadic habit of life.

- 2.20 This was further reinforced in a Decision Notice for an appeal in Norfolk that was issued in February 2018 (Ref: APP/V2635/W/17/3180533) that stated:

As discussed during the hearing, although the PPTS does not spell this [the planning definition] out, it has been established in case law (R v South Hams DC 1994) that the nomadism must have an economic purpose. In other words, gypsies and travellers wander or travel for the purposes of making or seeking their livelihood.

Legislation and Guidance for Gypsies and Travellers

- 2.21 Decision-making for policy concerning Gypsies, Travellers and Travelling Showpeople sits within a complex legislative and national policy framework and this study must be viewed in the context of this legislation and guidance. For example, the following key pieces of legislation and guidance are relevant when developing policies relating to Gypsies, Travellers and Travelling Showpeople:

- » The Housing Act, 1985
- » Planning Policy for Traveller Sites (PPTS), 2015
- » The Housing and Planning Act, 2016
- » National Planning Policy Framework (NPPF), 2021
- » Planning Practice Guidance⁵ (PPG), 2021

- 2.22 In addition, Case Law, Ministerial Statements, the outcomes of Local Plan Examinations and Planning Appeals, and Judicial Reviews, need to be taken into consideration. Relevant examples have been included in this report.

- 2.23 The primary guidance for undertaking the assessment of housing need for Gypsies, Travellers and Travelling Showpeople is set out in the PPTS (2015). It should be read in conjunction with the National Planning Policy Framework (NPPF). In addition, the Housing and Planning Act makes provisions for the assessment of need for those Gypsy, Traveller and Travelling Showpeople households living on sites and yards who do not meet the planning definition – through the assessment of all households living in caravans.

Planning Policy for Traveller Sites (PPTS) 2015

- 2.24 PPTS (2015), sets out the direction of Government policy. As well as introducing the planning definition of a Traveller, PPTS is closely linked to the NPPF. Among other objectives, the aims of the policy in respect of Traveller sites are (PPTS Paragraph 4):

- » *Local planning authorities should make their own assessment of need for the purposes of planning.*
- » *To ensure that local planning authorities, working collaboratively, develop fair and effective strategies to meet need through the identification of land for sites.*
- » *To encourage local planning authorities to plan for sites over a reasonable timescale.*
- » *That plan-making and decision-taking should protect Green Belt from inappropriate development.*

⁵With particular reference to the sections on *Housing needs of different groups* (May 2021).

- » *To promote more private Traveller site provision while recognising that there will always be those Travellers who cannot provide their own sites.*
- » *That plan-making and decision-taking should aim to reduce the number of unauthorised developments and encampments and make enforcement more effective.*
- » *For local planning authorities to ensure that their Local Plan includes fair, realistic and inclusive policies.*
- » *To increase the number of Traveller sites in appropriate locations with planning permission, to address under provision and maintain an appropriate level of supply.*
- » *To reduce tensions between settled and Traveller communities in plan-making and planning decisions.*
- » *To enable provision of suitable accommodation from which Travellers can access education, health, welfare, and employment infrastructure.*
- » *For local planning authorities to have due regard to the protection of local amenity and local environment.*

2.25 In practice, the document states that (PPTS Paragraph 9):

- » *Local planning authorities should set pitch targets for Gypsies and Travellers and plot targets for Travelling Showpeople, which address the likely permanent and transit site accommodation needs of Travellers in their area, working collaboratively with neighbouring local planning authorities.*

2.26 PPTS goes on to state (Paragraph 10) that in producing their Local Plan local planning authorities should:

- » *Identify and annually update a supply of specific deliverable sites sufficient to provide five years' worth of sites against their locally set targets.*
- » *Identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15.*
- » *Consider production of joint development plans that set targets on a cross-authority basis, to provide more flexibility in identifying sites, particularly if a local planning authority has special or strict planning constraints across its area (local planning authorities have a Duty-to-Cooperate on strategic planning issues that cross administrative boundaries).*
- » *Relate the number of pitches or plots to the circumstances of the specific size and location of the site and the surrounding population's size and density.*
- » *Protect local amenity and environment.*

2.27 Local Authorities now have a duty to ensure a 5-year land supply to meet the identified needs for Traveller sites. However, PPTS 2015 also notes in Paragraph 11 that:

- » *Where there is no identified need, criteria-based policies should be included to provide a basis for decisions in case applications nevertheless come forward. Criteria-based policies should be fair and should facilitate the traditional and nomadic life of Travellers, while respecting the interests of the settled community.*

Revised National Planning Policy Framework (NPPF) 2021

- 2.28 The most recent version of the revised National Planning Policy Framework was issued in July 2021. Paragraph 61 of the revised NPPF sets out that in determining the minimum number of homes needed, strategic plans should be based upon a local housing need assessment conducted using the standard method in national planning guidance.
- 2.29 Paragraph 62 then states that [emphasis added] *‘Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, **travellers**, people who rent their homes and people wishing to commission or build their own homes’*. The footnote to this section states that *‘Planning Policy for Traveller Sites sets out how travellers’ housing needs should be assessed for those covered by the definition in Annex 1 of that document.’*
- 2.30 This essentially sets out that the needs of households that meet the planning definition should be assessed under the PPTS and that the needs of households that are not found to meet the planning definition should be assessed as part of the wider housing needs of an area.
- 2.31 In an Appeal Decision that was published in March 2020 for an appeal in Central Bedfordshire (APP/P0240/C/18/3213822) the Inspector concluded in relation to the then Paragraph 61 (now Paragraph 62) of the NPPF that:

It seems to me that this wording makes clear that it is only those meeting that definition that should be included in an assessment of need for ‘planning definition’ travellers and that gypsies who have ceased travelling should be counted and provided for elsewhere and this is the approach proposed in the emerging LP. This does not, of course mean that these gypsies should be allocated ‘bricks and mortar’ type housing. They will also need a suitable supply of caravan sites to meet their needs

Lisa Smith v The Secretary of State for Housing, Communities and Local Government and others [2021]

- 2.32 In June 2021 Mr Justice Pepperall handed down judgment in *Lisa Smith v The Secretary of State for Housing, Communities and Local Government and others* [2021]. The case concerned whether the planning definition of Gypsies and Travellers contained in Annex 1 of the PPTS (2015) is discriminatory against Travellers who are settled and who no longer travel for work. Mr Justice Pepperall dismissed the claim and found the PPTS planning definition to be lawful. This further supports Paragraphs 61 and 62 of the NPPF that requires a separate assessment of need for Travellers who do not meet the PPTS planning definition, and that this need should be addressed through separate Local Plan policies to the Gypsy and Traveller Policy.

3. Methodology

Background

- 3.1 Over the past 10 years, ORS has continually refined a methodology for undertaking robust and defensible Gypsy, Traveller, and Travelling Showpeople Accommodation Needs Assessments. This has been updated in light of changes to PPTS in August 2015, the Housing and Planning Act (2016) the revised NPPF (2021), and the revised PPG (2021). It has also responded to changes set out by Planning Ministers, with particular reference to new household formation rates. This is an evolving methodology that has been adaptive to changes in planning policy as well as the outcomes of Local Plan Examinations and Planning Appeals.
- 3.2 PPTS (2015) contains a number of requirements for local authorities which must be addressed in any GTAA methodology. This includes the need to pay particular attention to early and effective community engagement with both settled and traveller communities (including discussing travellers' accommodation needs with travellers themselves); identification of permanent and transit site accommodation needs separately; working collaboratively with neighbouring local planning authorities; and establishing whether households fall within the planning definition for Gypsies, Travellers and Travelling Showpeople.
- 3.3 ORS would note that since the changes to the PPTS in August 2015 the ORS GTAA methodology has been repeatedly found to be sound and robust, including through Local Plan Examinations in Bedford, Blaby, Cambridge, Castle Point, Central Bedfordshire, Cheltenham, Cotswold, Daventry, East Hertfordshire, Gloucester, Maldon, Milton Keynes, Newham, Runnymede, South Cambridgeshire, South Northamptonshire, Tewkesbury, and Waverley.
- 3.4 An Appeal Decision for a Hearing in Central Bedfordshire (APP/P0240/C/18/3213822) that was issued in March 2020 concluded:
- '...whilst there have been some queries in previous appeal decisions over the conclusions of other GTAAs produced by ORS, the methodology, which takes into account the revisions made in 2015 to the Government's Planning Policy for Traveller Sites (PPTS), has nevertheless been accepted by Inspectors in a considerable number of Local Plan Examinations.'*
- 3.5 The Inspector for the East Herts District Plan also found the evidence base in relation to Gypsies and Travellers to be sound in her Inspection Report that was issued in July 2018. She concluded:
- 'The need of the travelling community has been carefully and robustly assessed and locations to meet identified needs have been allocated for the plan period. Policy HOU9 sets out the need for 5 permanent pitches for Gypsies and Travellers... the approach to the provision of housing is comprehensive, positively prepared, appropriate to the needs of the area and consistent with national policy.'*
- 3.6 The stages below provide a summary of the methodology that was used to complete this study. More information on each stage is provided in the appropriate sections of this report.

Glossary of Terms/Acronyms

^{3.7} A Glossary of Terms/Acronyms can be found in **Appendix A**.

Desk-Based Review

^{3.8} ORS collated a range of secondary data that was used to support the study. This included:

- » Census data.
- » Traveller Caravan Count data.
- » Records of unauthorised sites/encampments.
- » Information on planning applications/appeals.
- » Information on enforcement actions.
- » Existing Needs Assessments and other relevant local studies.
- » Existing national and local policy, guidance, and best practice.

Stakeholder Engagement

^{3.9} As this was an update of an existing GTAA for North Somerset that was published in 2017 there was no formal stakeholder engagement programme completed. However, there were extensive discussions with North Somerset Council Officers, with staff from the Housing Association that manage one of the large public sites, and with the owner of one of the large private sites. The purpose of these discussions were to seek to identify any changes of circumstances on sites that were included in the baseline for the 2017 GTAA, and to determine any new planning activity relating to new permissions and the outcomes of planning appeals, as well as details on short-term encampments.

Working Collaboratively with Neighbouring Planning Authorities

^{3.10} As this was an update of an existing GTAA for North Somerset that was published in 2017 there was no formal engagement programme completed with neighbouring planning authorities. However, there have been discussions between Council Officers from North Somerset and neighbouring planning authorities during the preparation of the new Local Plan. For completeness, the outcomes from the most recent interviews that have been completed with neighbouring authorities for other GTAA's in the area are included in this report:

- » Bath & North East Somerset (2020)
- » Bristol (2020)
- » Mendip (2020)

Survey of Travelling Communities

- 3.11 As this is an update of the 2017 GTAA a 2-stage approach was taken to update the household interviews.
- » **Stage 1:** Review of site baseline and new interviews where required.
 - » **Stage 2:** Review of 2017 household interviews.

Stage 1: Review of Site Baseline

- 3.12 ORS worked closely with the Council to review the 2017 GTAA site baseline to determine if there have been any changes on existing sites and yards (i.e. additional pitches, changes of site ownership and occupiers etc.), and to identify any new sites that have been granted planning permission or that have been allowed at appeal. In addition this review also sought to identify any planning applications that have been refused or dismissed at appeal where the sites are currently occupied unlawfully.
- 3.13 Through this process it was possible to complete new household interviews with households that were not interviewed for the 2017 GTAA, or to determine household demographics and characteristics through planning and appeal statements, or through discussions with planning agents.
- 3.14 ORS worked closely with the Council to ensure that the interviews would collect all the necessary information to support the study and used the site interview questions that were used for the 2020 GTAA (see **Appendix E**). These take account of past changes to PPTS and collect the information ORS feel is necessary to apply the planning definition of a Traveller. All interviews were completed by members of our dedicated team of experienced Researchers who work on our GTAA studies across England and Wales. Researchers attempted to conduct semi-structured interviews with residents to determine their current demographic characteristics, their current or future accommodation needs, whether there is any over-crowding or the presence of concealed households and travelling characteristics. Researchers also sought to identify contacts living in bricks and mortar to interview, as well as an overall assessment of each site to determine any opportunities for intensification or expansion to meet future needs.
- 3.15 Researchers also sought information from residents on the type of pitches they may require in the future – for example private or socially rented, together with any features they may wish to be provided on a new pitch or site.
- 3.16 Where it was not possible to undertake an interview, Researchers sought to capture as much information as possible about each pitch through a proxy interview from sources including neighbouring residents and site management (if present).

Stage 2: Review of 2017 household interviews

- 3.17 ORS worked closely with the Council to review the outcomes of the interviews that were completed to support the 2017 GTAA where there have been no known changes to pitch numbers and where ownership is the same. This involved discussions with Officers responsible for dealing with planning applications and appeals for Travellers; with Officers responsible for completing the Traveller Caravan Count; with Officers responsible for enforcement; with staff responsible for

managing public sites in North Somerset; and with the owners of a large private site in North Somerset. The purpose of this stage of the study was to determine whether there have been any changes to site composition since 2017. When this work was completed a modelling exercise was completed to uplift the demographics of site residents to the baseline date for this study, and to model new births for the period 2017-2022.

Engagement with Bricks and Mortar Households

- 3.18 The 2011 Census recorded 27 households that identified as either Gypsies or Irish Travellers who lived in a house or bungalow in North Somerset and 16 living in a flat or maisonette.
- 3.19 ORS apply a rigorous approach to making contact with bricks and mortar households as this is a common issue raised at Local Plan Examinations and Planning Appeals. Contacts were sought through a range of sources including the interviews with people on existing sites and yards; intelligence from the stakeholder interviews; information from housing registers; and other local knowledge from stakeholders. Through this approach the GTAA endeavoured to do everything to give households living in bricks and mortar the opportunity to make their views known.
- 3.20 As a rule, ORS do not make any assumptions on the overall needs from household in bricks and mortar based on the outcomes of any interviews that are completed, as in our experience this leads to a significant over-estimate of the number of households wishing to move to a site or a yard. ORS work on the assumption that all those wishing to move will make their views known to us based on the wide range of publicity put in place.

Timing of the Fieldwork

- 3.21 ORS are fully aware of the transient nature of many travelling communities and subsequent seasonal variations in site and yard occupancy. ORS would normally aim to complete fieldwork during the non-travelling season, and also to avoid days of known local or national events. The update to the site baseline was completed over an extended period between June 2021 and January 2022.

Applying the Planning Definition

- 3.22 The primary change to PPTS (2015) in relation to the assessment of need was the change to the definition of a Gypsy, Traveller or Travelling Showperson for planning purposes. Through the site interviews ORS sought to collect information necessary to assess each household against the planning definition. The revised PPTS was issued in 2015 and a number of relevant appeal decisions have been issued by the Planning Inspectorate on how the planning definition should be applied (see Paragraphs 2.19 and 2.20 for examples) – these support the view that households need to be able to demonstrate that they travel for work purposes, or for seeking work, to meet the planning definition, and stay away from their usual place of residence when doing so, or have ceased to travel for work purposes temporarily due to education, ill health or old age.
- 3.23 The household survey included a structured section of questions to record information about the travelling characteristics of household members. This included questions on the following key issues:

- » Whether any household members have travelled in the past 12 months.

- » Whether household members have ever travelled.
- » The reasons for travelling.
- » Where household members travelled to.
- » The times of the year that household members travelled.
- » Where household members stay when they are away travelling.
- » When household members stopped travelling.
- » The reasons why household members stopped travelling.
- » Whether household members intend to travel again in the future.
- » When and the reasons why household members plan to travel again in the future.

3.24 When the household interviews were completed, the answers from the questions on travelling were used to determine the status of each household against the planning definition in PPTS (2015). Through a combination of responses, households need to provide sufficient information to demonstrate that household members travel for work purposes, or for seeking work, and in doing so stay away from their usual place of residence, or that they have ceased to travel temporarily due to education, ill health or old age, and plan to travel again for work purposes in the future. The same definition applies to Travelling Showpeople as to Gypsies and Travellers.

3.25 Households that need to be formally considered in the GTAA fall under one of three classifications. Only those households that meet, or may meet, the planning definition will form the components of need to be formally included in the GTAA:

- » Households that travel under the planning definition.
- » Households that have ceased to travel temporarily under the planning definition.
- » Households where an interview was not possible who may fall under the planning definition.

3.26 Whilst the needs of those households that do not meet the planning definition do not need to be included in the GTAA, they have been assessed to provide the Council with components of need to consider as part of their work on wider housing needs assessments. This is consistent with the requirements of the revised NPPF (2021).

Undetermined Households

3.27 As well as calculating need for households that meet the planning definition, the needs of the households where an interview was not completed (either due to refusal to be interviewed or households that were not present during the fieldwork period) need to be assessed as part of the GTAA where they are believed to be Gypsies and Travellers who may meet the planning definition. Whilst there is no law or guidance that sets out how the needs of these households should be addressed; an approach has been taken that seeks an estimate of potential need from these households. This will be an additional need figure over and above the need identified for households that meet the planning definition.

3.28 The estimate seeks to identify potential current and future need from any pitches known to be temporary or unauthorised, and through new household formation. As the demographics of any

undetermined households are unknown, the ORS national household formation rate of 1.50% has been used.

- 3.29 Should further information be made available to the Council that will allow for the planning definition to be applied, these households could either form a confirmed component of need to be addressed through the GTAA or through wider assessments of housing need.
- 3.30 ORS believe it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether households where an interview was not completed meet the planning definition based on the outcomes of households where an interview was completed.
- 3.31 However, data that has been collected from over 5,000 household interviews that have been completed by ORS since the changes to PPTS in 2015 suggests that overall, approximately 30% of households who have been interviewed meet the planning definition (this rises to 70% for Travelling Showpeople based on over 400 interviews that have been completed) – and in some local authorities, no households meet the planning definition.
- 3.32 ORS are not implying that this is an official national statistic - rather a statistic based on the outcomes of our fieldwork since the introduction of PPTS (2015). It is estimated that there are 14,000 Gypsy and Traveller pitches in England and ORS have spoken with households on approximately 30% of them at a representative range of sites. Approximately 30% meet the planning definition. It is ORS' view therefore that this is the most comprehensive national statistic in relation to households that meet the planning definition in PPTS (2015) and should be seen as a robust statistical figure.
- 3.33 This would also suggest that it is likely that only a proportion of the potential need identified from undetermined households will need conditioned Gypsy and Traveller pitches, and that the needs of the majority will need to be addressed through separate Local Plan Policies.
- 3.34 The ORS methodology to address the need arising from undetermined households was supported by the Planning Inspector for a Local Plan Examination for Maldon District Council, Essex. In his Report that was published on 29th June 2017 he concluded:

The Council's stance is that any need arising from 'unknowns' should be a matter left to the planning application process. Modifications to Policy H6 have been put forward by the Council setting out criteria for such a purpose, which I consider further below. To my mind, that is an appropriate approach. While there remains a possibility that up to 10 further pitches may be needed, that cannot be said to represent identified need. It would be unreasonable to demand that the Plan provide for needs that have not been established to exist.

Households that Do Not Meet the Planning Definition

- 3.35 Households who do not travel for work now fall outside of the planning definition of a Traveller. However Romany Gypsies, Irish and Scottish Travellers may be able to claim a right to culturally appropriate accommodation under the Equality Act (2010) as a result of their protected characteristics. In addition, provisions set out in the Housing and Planning Act (2016) now include a duty (under Section 8 of the 1985 Housing Act that covers the requirement for a periodical review of housing needs) for local authorities to consider the needs of people residing in or resorting to their district with respect to the provision of sites on which caravans can be

stationed, or places on inland waterways where houseboats can be moored. Draft Guidance⁶ related to this section of the Act has been published setting out how the government would want local housing authorities to undertake this assessment and it is the same as the GTAA assessment process. The implication is therefore that the housing needs of any Gypsy and Traveller households who do not meet the planning definition of a Traveller will need to be assessed as part of the wider housing needs of the area and will form a subset of the wider need arising from households residing in caravans. This is echoed in the revised NPPF (July 2021).

- 3.36 Paragraph 62 of the revised NPPF states that [emphasis added] *'Within this context, the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policies (including, but not limited to, those who require affordable housing, families with children, older people, students, people with disabilities, service families, **travellers**, people who rent their homes and people wishing to commission or build their own homes'*. The footnote to this section states that *'Planning Policy for Traveller Sites sets out how travellers' housing needs should be assessed for those covered by the definition in Annex 1 of that document.'*

Calculating Current and Future Need

- 3.37 To identify need, PPTS (2015) requires an assessment for current and future pitch requirements but does not provide a methodology for this. However, as with any housing assessment, the underlying calculation can be broken down into a relatively small number of factors. In this case, the key issue is to compare the supply of pitches available for occupation with the current and future needs of the population.

Supply of Pitches

- 3.38 The first stage of the assessment sought to determine the number of occupied, vacant, and potentially available supply in the study area:
- » Current vacant pitches.
 - » Pitches currently with planning consent due to be developed within 5 years.
 - » Pitches vacated by people moving to housing.
 - » Pitches vacated by people moving from the study area (out-migration).
- 3.39 It is important when seeking to identify supply from vacant pitches that they are in fact available for general occupation – i.e. on a public or social rented site, or on a private site that is run on a commercial basis with anyone being able to rent a pitch if they are available. Typically, vacant pitches on small private family sites are not included as components of available supply but can be used to meet any current and future need from the family living on the site.

⁶ Draft guidance to local housing authorities on the periodical review of housing needs for caravans and houseboats. DCLG (March 2016).

Current Need

- 3.40 The second stage was to identify components of current need, which is not necessarily the need for pitches because they may be able to be addressed by space already available in the study area. It is important to address issues of double counting:
- » Households on unauthorised developments for which planning permission is not expected.
 - » Concealed, doubled-up or over-crowded households (including single adults).
 - » Households in bricks and mortar *needing* to move to sites.
 - » Households in *need* on waiting lists for public sites.

Future Need

- 3.41 The final stage was to identify components of future need. This includes the following four components:
- » Teenage children in need of a pitch of their own in the next 5 years.
 - » Households living on sites with temporary planning permission.
 - » New household formation.
 - » In-migration/roadside.
- 3.42 Household formation rates are often the subject of challenge at appeals or examinations. ORS firmly believe that any household formation rates should use a robust local evidence base, rather than simply relying on national precedent. The approach taken is set out in more detail in Chapter 7 of this report.
- 3.43 ORS are also increasingly identifying households and adult household members who have been forced to leave sites due to over-crowding or exceeding planning conditions on the number of caravans permitted on sites. These households are typically living on the roadside or doubling-up on pitches in neighbouring local authorities. ORS include these households as components of hidden need and term them *displaced in-migration*.
- 3.44 All of these components of supply and need are presented in tabular format which identify the overall net need for current and future accommodation for Gypsies, Travellers and Travelling Showpeople. This has proven to be a robust model for identifying needs. The residential and transit pitch needs for Gypsies and Travellers and Travelling Showpeople are identified separately and the needs are to 2042.

Pitch Turnover

- 3.45 Some assessments of need make use of pitch turnover as an ongoing component of supply. ORS do not agree with this approach or about making any assumptions about annual turnover rates. This approach frequently ends up significantly under-estimating need as, in the majority of cases, vacant pitches on sites are not available to meet any local need. The use of pitch turnover has been the subject of a number of Inspectors Decisions, for example APP/J3720/A/13/2208767 found a GTAA to be unsound when using pitch turnover and concluded:

West Oxfordshire Council relies on a GTAA published in 2013. This identifies an immediate need for 6 additional pitches. However, the GTAA methodology treats pitch turnover as a component of supply. This is only the case if there is net outward migration, yet no such scenario is apparent in West Oxfordshire. Based on the evidence before me I consider the underlying criticism of the GTAA to be justified and that unmet need is likely to be higher than that in the findings in the GTAA.

- 3.46 In addition, Best Practice for Assessing the Accommodation Needs of Gypsies and Travellers⁷ produced jointly in June 2016 by organisations including Friends, Families and Travellers, the London Gypsy and Traveller Unit, the York Travellers Trust, the Derbyshire Gypsy Liaison Group, Garden Court Chambers and Leeds GATE concluded that:

Assessments involving any form of pitch turnover in their supply relies upon making assumptions, a practice best avoided. Turnover is naturally very difficult to assess accurately and in practice does not contribute meaningfully to additional supply so should be very carefully assessed in line with local trends. Mainstream housing assessments are not based on the assumption that turnover within the existing stock can provide for general housing needs.

- 3.47 As such, other than current vacant pitches on sites that are known to be available, or pitches that are known to become available through the household interviews, pitch turnover has not been considered as a component of supply in this GTAA.

Transit Provision

- 3.48 GTAA studies require the identification of demand for transit provision. While the majority of Gypsies and Travellers have permanent bases either on Gypsy and Traveller sites or in bricks and mortar and no longer travel, other members of the community either travel permanently or for part of the year. Due to the mobile nature of the population a range of sites can be developed to accommodate Gypsies and Travellers as they move through different areas.

- » **Transit sites** - full facilities where Gypsies and Travellers might live temporarily (for up to three months) – for example, to work locally, for holidays or to visit family and friends.
- » **Emergency stopping places** - more limited facilities.
- » **Temporary sites and stopping places** - only temporary facilities to cater for an event.
- » **Negotiated stopping places** - agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time.

- 3.49 Transit sites serve a specific function of meeting the needs of Gypsy and Traveller households who are visiting an area or who are passing through on the way to somewhere else. A transit site typically has a restriction on the length of stay of usually around 12 weeks and has a range of facilities such as water supply, electricity, and amenity blocks.

⁷ See www.londongypsiesandtravellers.org.uk/resources/ for details.

- 3.50 An alternative to or in addition to a transit site is an emergency stopping place. This type of site also has restrictions on the length of time for which someone can stay on it but has much more limited facilities with typically only a source of water and chemical toilets provided.
- 3.51 Another alternative is ‘negotiated stopping’. The term ‘negotiated stopping’ is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent ‘built’ transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the authority and the (temporary) residents regarding expectations on both sides.
- 3.52 Temporary stopping places can be made available at times of increased demand due to fairs or cultural celebrations that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.
- 3.53 The Criminal Justice and Public Order Act 1994 (Section 62a) is particularly important with regard to the issue of Gypsy and Traveller transit site provision. Section 62a of the Act allows the police to direct trespassers to remove themselves and their vehicles and property from any land where a suitable transit pitch on a relevant caravan site is available within the same local authority area (or within the county in two-tier local authority areas).
- 3.54 Consideration will also have to be given to the Police, Crime, Sentencing and Courts Act which came into force in June 2022. Part 4 of the Act gives the Police additional powers to deal with unauthorised encampments through new offences relating to residing on land without consent in or with a vehicle and new powers in relation to the seizure of property.
- 3.55 In order to investigate the potential need for transit provision when undertaking work to support the study, ORS sought to undertake analysis of any records of unauthorised sites and encampments, as well as information from the Department for Levelling Up, Housing and Communities (DLUHC)⁸ Traveller Caravan Count. The outcomes of discussions with Council Officers and with Officers from neighbouring planning authorities were also taken into consideration when determining this element of need in the study area.

⁸ Formerly the Ministry for Housing, Communities and Local Government (MHCLG).

4. Gypsy, Traveller & Travelling Showpeople Sites & Population

Introduction

- 4.1 One of the main considerations of this study is to provide evidence to support the provision of pitches and plots to meet the current and future accommodation needs of Gypsies, Travellers and Travelling Showpeople. A pitch is an area normally occupied by one household, which typically contains enough space for one or two caravans but can vary in size⁹. A site is a collection of pitches which form a development exclusively for Gypsies and Travellers. For Travelling Showpeople, the most common descriptions used are a plot for the space occupied by one household and a yard for a collection of plots which are typically exclusively occupied by Travelling Showpeople. Throughout this study the main focus is upon how many extra pitches for Gypsies and Travellers and plots for Travelling Showpeople are required in the study area.
- 4.2 The public and private provision of mainstream housing is also largely mirrored when considering Gypsy and Traveller accommodation. One common form of a Gypsy and Traveller site is the publicly provided residential site, which is provided by a Local Authority or by a Registered Provider (usually a Housing Association). Pitches on public sites can be obtained through signing up to a waiting list, and the costs of running the sites are met from the rent paid by the tenants (similar to social housing).
- 4.3 The alternative to a public residential site is a private residential site and yard for Gypsies, Travellers and Travelling Showpeople. These result from individuals or families buying areas of land and then obtaining planning permission to live on them. Households can also rent pitches on existing private sites. Therefore, these two forms of accommodation are the equivalent to private ownership and renting for those who live in bricks and mortar housing. Generally, the majority of Travelling Showpeople yards are privately owned and managed.
- 4.4 The Gypsy, Traveller and Travelling Showpeople population also has other types of sites due to its mobile nature. Transit sites tend to contain many of the same facilities as a residential site, except that there is a maximum occupancy period of residence which can vary from a few days or weeks to a period of months. An alternative to a transit site is an emergency or negotiated stopping place. This type of site also has restrictions on the length of time someone can stay on it but has much more limited facilities. Both of these two types of site are designed to accommodate, for a temporary period, Gypsies, Travellers and Travelling Showpeople whilst they travel. A number of authorities also operate an accepted encampments policy where short-term stopovers are tolerated without enforcement action.

⁹ Whilst it has now been withdrawn, Government Guidance on Designing Gypsy and Traveller Sites recommended that, as a general guide, an average family pitch must be capable of accommodating an amenity building, a large trailer [a static caravan or park home for example] and touring caravan, parking space for two vehicles and a small garden area.

- 4.5 Further considerations for the Gypsy and Traveller population are unauthorised developments and encampments. Unauthorised developments occur on land which is owned by the Gypsies and Travellers or with the approval of the landowner, but for which they do not have planning permission to use for residential purposes. Unauthorised encampments occur on land which is not owned by the Gypsies and Travellers.

Sites and Yards in North Somerset

- 4.6 In North Somerset, at the base date for the GTAA, there were 4 public Gypsy and Traveller sites as well as 1 public pitch on a private site (34 pitches); 5 privately owned sites with permanent planning permission (66 pitches); no sites with temporary planning permission; no sites that are tolerated for planning purposes; 5 unauthorised sites (9 pitches)¹⁰; and 1 Travelling Showmen's yard (5 plots). There were no public transit sites identified. See **Appendix D** for further details.

Figure 5 - Total amount of provision in North Somerset January 2022

Category	Sites/Yards	Pitches/Plots
Public sites	4	34
Private sites with permanent planning permission	5	66
Private sites with temporary planning permission	0	0
Tolerated sites	0	0
Unauthorised sites	5	9
Public transit sites	0	0
Travelling Showpeople yards	1	5
TOTAL	14	110

DLUHC Traveller Caravan Count

- 4.7 Another source of information available on the Gypsy, Traveller and Travelling Showpeople population is the bi-annual Traveller Caravan Count which is conducted by each Local Authority in England on a specific date in January and July of each year and reported to DLUHC. This is a statistical count of the number of caravans on both authorised and unauthorised sites across England. With effect from July 2013, it was renamed the Traveller Caravan Count due to the inclusion of data on Travelling Showpeople.
- 4.8 As this count is of caravans and not households, it makes it more difficult to interpret for a study such as this because it does not count pitches or resident households. The count is merely a 'snapshot in time' conducted by the Local Authority on a specific day, and any unauthorised sites or encampments which occur on other dates will not be recorded. Likewise, any caravans that are away from sites on the day of the count will not be included. As such it is not considered appropriate to use the outcomes from the Traveller Caravan Count in the calculation of current and future need as the information collected during the site visits is seen as more robust and fit-for-purpose. However, the Caravan Count data has been used to *support* the identification of the need to provide for transit provision and this is set out later in this report.

¹⁰ One of these sites at Kings Field was granted a 3-year temporary planning consent at appeal in June 2022.

5. Stakeholder Engagement

Introduction

- 5.1 ORS undertook a stakeholder engagement programme as part of the 2017 GTAA to complement the information gathered through interviews with members of the Travelling Community. This consultation took the form of telephone interviews which were tailored to the role of the individual. Given that this report is an update of the 2017 GTAA no formal stakeholder engagement programme was completed. However, there were extensive discussions with Council Officers, Site Managers, and Site Owners in relation the any changes of circumstances on sites that were included in the baseline for the 2017 GTAA, and to determine any new planning activity relating to new permissions and the outcomes of planning appeals, as well as details on short-term encampments.
- 5.2 As stated in the Planning Policy for Traveller Sites, Local Authorities have a duty to cooperate on strategic planning issues that cross administrative boundaries (S.110 Localism Act 2011). In order to explore issues relating to short-term encampments; transit provision; and cross-border issues, ORS interviewed a Planning Officer from 4 neighbouring local authorities to support the 2017 GTAA.
- » Bath and North East Somerset
 - » Bristol
 - » Mendip
 - » Sedgemoor
- 5.3 Whilst no further interviews have been completed to support this study, the outcomes from the most up-to-date interviews that ORS have completed with these local authorities are set out below. These were all completed in 2020. Unfortunately, there is not an up-to-date interview summary for Sedgemoor.
- 5.4 Due to issues surrounding data protection, and in order to protect the anonymity of those who took part, this section presents a summary of the views expressed by interviewees and verbatim comments have not been used. The views expressed in this section of the report represent a balanced summary of the views expressed by stakeholders, and on the views of the individuals concerned, rather than the official policy of their Council or organisation.

Bath and North East Somerset Council (2020)

- 5.5 With regard to **overall accommodation need** in Bath and North East Somerset, the views of the officer interviewed were as follows:
- » Since the last GTAA, Bath and North East Somerset (B&NES) Council have provided direct provision through developing and delivering a site at Carrswood, Twerton. The site provides 8 permanent pitches and 5 transit pitches.
 - » In order to understand whether current provision is meeting the needs of Travellers living in the area an update of the Council's GTAA is in progress.

- » Short-term unauthorised encampments in B&NES mainly occurring during the summer months. The needs of encampments are met through the provision of 5 transit pitches that are available on a daily basis.

5.6 With regard to the subject of **cross border issues and the Duty to Cooperate**, the views of the officer interviewed were as follows:

- » The other authorities in the West of England were suggested to be meeting their own need. However, it was acknowledged there is a need for updated and consistent assessments of need to be undertaken across the area.
- » B&NES engage in cross-border joint working on planning and housing issues across the West of England. There has also been an assessment of need across the sub-region on a consistent basis, deriving individual figures for each Unitary Authority.
- » Through the cross-border joint working ventures it was suggested that B&NES and its neighbouring authorities were all complying with the Duty to Cooperate.

Bristol City Council (2020)

5.7 With regard to **overall accommodation need** in Bristol, the views of the officer interviewed were as follows:

- » Since the last GTAA, GRT officials have met with the Bristol City Council Legal Team, Strategic City Planning and the Mayoral Cabinet to put forward proposals for prospective site development. The team have prepared for a public consultation regarding new site provision; however, the proposals were all unsuccessful due to funding issues in addressing the city's housing crisis.
- » There is one permanent 12-pitch site, Rose Meadow View, in the south of the city which is for Gypsies and Travellers. There is also one 20-pitch transit site, St Anthony's Park, which is in the north of the city and is for Gypsies and Travellers. Residents can stay on this site for a maximum period of thirteen weeks while passing through the city for work purposes. Provision for Showpeople consists of one 12-plot Showpeople Yard, Locks Yard, which is privately owned.
- » The Council provide services to help meet the needs of Gypsies, Travellers and Travelling Showpeople living in bricks and mortar in the area. There is both a telephonic and physical drop-in support service, a specialist youth provision and Gypsy Romany Traveller (GRT) Voices Group where members of the community can attend.

5.8 With regard to the subject of **cross border issues and the Duty to Cooperate**, the views of the officer interviewed were as follows:

- » Extended families of Bristol based Gypsy and Traveller communities live in the neighbouring Local Authorities (LA's). This can result in potential cross-border issues as families can look to access services across LA's.
- » Bristol City Council has not recently been requested to assist in making provision for Traveller sites to meet needs arising in neighbouring areas, and the City Council has not made such a request of other authorities.

- » Bristol City Council is engaged with neighbouring authorities; and the West of England Combined Authority has an engagement and coordination role. Compliance with the Duty to Cooperate is one of the matters considered at development plan examinations.

Mendip District Council (2020)

5.9 With regard to **overall accommodation need** in Mendip, the views of the officer interviewed were as follows:

- » Since the last GTAA, there has been limited progress on a Gypsy and Traveller Development Plan Document (DPD) or identification of sites.
- » There are around 35 authorised sites across the district which are mainly small private sites (1 – 5 pitches).
- » There is an acknowledged significant shortfall in provision and a need for more authorised sites in the district. Mendip's situation is unusual with a high proportion of New Age Travellers who are not seeking traditional built Traveller site provision or who actually 'travel', in the traditional sense. In recent years, the picture has become more complex with evidence of encampments/unauthorised roadside caravans being taken up as alternative accommodation to housing

5.10 With regard to the subject of **cross border issues and the Duty to Cooperate**, the views of the officer interviewed were as follows:

- » The officer interviewed was aware of Gypsy and Traveller groups who move through Mendip from Wiltshire and to other parts of the Southwest. However, there is no collated information to know whether these are regular patterns or associated with events.
- » There are substantial joint working ventures between the Somerset authorities and a joint GTAA is expected to be re-commissioned.
- » Mendip and its neighbouring authorities were all believed to be complying well with the Duty to Cooperate.

6. Survey of Travelling Communities

Interviews with Gypsies and Travellers

- 6.1 One of the major components of this study was a detailed survey of the Gypsy and Traveller population living in the study area, and also efforts to engage with the bricks and mortar community.
- 6.2 Through the desk-based research ORS identified 4 public Gypsy and Traveller sites and 1 public pitch on a private site; 5 privately owned sites with permanent planning permission; no sites with temporary planning permission; no sites that are tolerated for planning purposes; 5 unauthorised sites; and 1 Travelling Showmen’s yard within the study area.
- 6.3 The tables below set out the number of pitches/plots, the number of interviews that were completed, and any reasons why interviews were not able to be completed.

Figure 6 – Interviews completed in North Somerset

Site Status	Pitches/Plots	Interviews	Reasons for not completing interviews/additional interviews
Public Sites			
Box Bush Lane	1	2	Permission for 2 caravans
Greenfields Way	24	23	1 x vacant
Moorland Park (1 public pitch)	1	1	-

Interviews with Gypsies and Travellers in Bricks and Mortar

- ^{6.4} Despite all of the efforts that were made it was not possible to identify any households living in bricks and mortar to interview.

7. Current and Future Pitch Provision

Introduction

- 7.1 This section focuses on the pitch provision which is needed in the study area currently and to 2042, with a break to 2038 to meet the new North Somerset Local Plan period. This includes both current unmet need and need which is likely to arise in the future¹². This time period allows for robust forecasts of the requirements for future provision, based upon the evidence contained within this study and also secondary data sources. Whilst the difficulty in making accurate assessments beyond 5 years has been highlighted in previous studies, the approach taken in this study to estimate new household formation has been accepted by Planning Inspectors as the most appropriate methodology to use.
- 7.2 We would note that this section is based upon a combination of the on-site surveys, planning records and stakeholder interviews. In many cases, the survey data is not used in isolation, but instead is used to validate information from planning records or other sources.
- 7.3 This section concentrates not only upon the total provision which is required in the area, but also whether there is a need for any transit sites and/or emergency stopping place provision.

New Household Formation Rates

- 7.4 Nationally, a household formation and growth rate of 3.00% net per annum¹³ has been commonly assumed and widely used in local Gypsy and Traveller assessments, even though there is no statistical evidence of households growing so quickly. The result has been to inflate both national and local requirements for pitches unrealistically. In this context, ORS prepared a *Technical Note on Gypsy and Traveller Household Formation and Growth Rates* in 2015 and updated it in June 2020. The main conclusions are set out here and the full paper is in **Appendix F**.
- 7.5 Those seeking to provide evidence of high annual net household growth rates for Gypsies and Travellers have sometimes sought to rely on increases in the number of caravans, as reflected in caravan counts. However, caravan count data is unreliable and erratic – so the only proper way to project future population and household growth is through demographic analysis.
- 7.6 The Technical Note concludes that in fact, the growth in the national Gypsy and Traveller population may be as low as 1.25% per annum – much less than the 3.00% per annum often assumed, but still greater than in the settled community. Even using extreme and unrealistic assumptions, it is hard to find evidence that net Gypsy and Traveller population and household growth rates are above 2.00% per annum nationally.
- 7.7 The often assumed 3.00% per annum net household growth rate is unrealistic and would require clear statistical evidence before being used for planning purposes. In practice, the best available

¹² See Paragraphs 3.41 and 3.42 for details of components on current and future need.

¹³ Page 25, Gypsy and Traveller Accommodation Needs Assessments – Guidance (DCLG – 2007) *Now withdrawn*.

evidence supports a national net household growth rate of 1.50% per annum for Gypsies and Travellers (in addition research by ORS has identified a national growth rate of 1.00% for Travelling Showpeople) and this has also been adjusted locally based on site demographics.

- 7.8 This view has been supported by Planning Inspectors in a number of Decision Notices. The Inspector for an appeal in Doncaster that was issued in November 2016 (Ref: APP/F4410/W/15/3133490) where the agent acting on behalf of the appellant claimed that a rate closer to 3.00% should be used concluded:

In assessing need account also needs to be taken of likely household growth over the coming years. In determining an annual household growth rate, the Council relies on the work of Opinions Research Services (ORS), part of Swansea University. ORS's research considers migration, population profiles, births & fertility rates, death rates, household size data and household dissolution rates to determine average household growth rates for gypsies and travellers. The findings indicate that the average annual growth rate is in the order of 1.50% but that a 2.50% figure could be used if local data suggest a relatively youthful population. As the Council has found a strong correlation between Doncaster's gypsy and traveller population age profile and the national picture, a 1.50% annual household growth rate has been used in its 2016 GTANA. Given the rigour of ORS's research and the Council's application of its findings to the local area I accept that a 1.50% figure is justified in the case of Doncaster.

- 7.9 Another more recent case was in relation to an appeal in Guildford that was issued in March 2018 (Ref: APP/W/16/3165526) where the agent acting on behalf of the appellant again claimed that a rate closer to 3.00% should be used. The Inspector concluded:

There is significant debate about household formation rates and the need to meet future growth in the district. The obvious point to make is that this issue is likely to be debated at the local-plan examination. In my opinion, projecting growth rates is not an exact science and the debate demonstrates some divergence of opinion between the experts. Different methodologies could be applied producing a wide range of data. However, on the available evidence it seems to me that the figures used in the GTAA are probably appropriate given that they are derived by using local demographic evidence. In my opinion, the use of a national growth rate and its adaptation to suit local or regional variation, or the use of local base data to refine the figure, is a reasonable approach.

- 7.10 In addition, the Technical Note has recently been accepted as a robust academic evidence base and has been published by the Social Research Association in its journal Social Research Practice in December 2017. The overall purpose of the journal is to encourage and promote high standards of social research for public benefit.

- 7.11 ORS assessments take full account of the net local household growth rate per annum calculated on the basis of demographic evidence from the site surveys, and the 'baseline' includes all current authorised households, all households identified as in current need (including concealed households, movement from bricks and mortar and those on waiting lists not currently living on a pitch or plot), as well as households living on tolerated unauthorised pitches or plots who are not included as current need. The assessments of future need also take account of modelling projections based on birth and death rates, household dissolution, and in-/out-migration.

- 7.12 Overall, the household growth rate used for the assessment of future needs has been informed by local evidence. This demographic evidence has been used to adjust the ORS national growth rate of 1.50% up or down based on the proportion of those aged under 18 (by planning status). In North Somerset, this approach has been taken to determine the new household formation rate for Gypsy and Traveller households that met the planning definition and for Gypsies and Travellers that did not meet the planning definition.
- 7.13 For households that met the planning definition 36% of residents were aged under 18. This demographic evidence is the same the ORS national growth rate of 1.50% (which is based on 36% aged under 18). Therefore, a rate of 1.50% has been used based on the proportion of those aged under 18 in households that met the planning definition in North Somerset.
- 7.14 For households that did not meet the planning definition 49% of residents were aged under 18. This demographic evidence is higher than the ORS national growth rate of 1.50% (which is based on 36% aged under 18). Therefore, an adjusted rate of 2.00% has been used based on the proportion of those aged under 18 in households that did not meet the planning definition in North Somerset.
- 7.15 In certain circumstances where the numbers of households and children are low, or the population age structure is skewed by certain age groups, it is not appropriate to apply a percentage rate for new household formation. In these cases, a judgement is made on likely new household formation based on the age and gender of the children. This is based on the assumption that 50% of households likely to form will stay in the area. This is based on evidence from other GTAAs that ORS have completed across England and Wales. This approach has been taken to determine levels of new household formation for Travelling Showpeople in North Somerset.
- 7.16 The ORS national formation rate of 1.50% has been used to model new household formation for undetermined households. This has been used as the demographics of residents are unknown.
- 7.17 New household formation has been calculated from year 6 of the GTAA period onwards. New household formation for years 0-5 of the GTAA period is from teenagers in need of a pitch in the next 5 years who have been identified as components of need in the household interviews. This eliminates any double counting in the assessment of need.

Breakdown by Year Bands

- 7.18 In addition to tables which set out the overall need for Gypsies and Travellers, the overall need has also been broken down by 5-year bands as required by PPTS (2015). The way that this is calculated is by including all current need (from unauthorised pitches, pitches with temporary planning permission, concealed and doubled-up households, 5 year need from teenage children, and net movement from bricks and mortar) in the first 5 years. In addition, the total net new household formation is split across the GTAA period based on the compound rate of growth that was applied rather than being split equally over time.
- 7.19 A split is also included to 2038 in line with the proposed time period for the new North Somerset Local Plan.

Applying the Planning Definition

- 7.20 The outcomes from the household interviews were used to determine the status of each household against the planning definition in PPTS (2015). This assessment was based on the responses to the questions given to Researchers. Only those households that met the planning definition or those who demonstrated that they have ceased to travel temporarily (due to education, ill health, or old age) form the components of need in the GTAA that will need to be addressed through a Gypsy and Traveller Local Plan Policy. In addition, households where an interview was not completed who may meet the planning definition have also been included as a potential additional component of need from undetermined households. Whilst they do not need to be formally considered in the GTAA, need from households that did not meet the planning definition has also been assessed to provide the Council with information on levels of need that will have to be considered as part of the wider housing needs of the area.
- 7.21 The information used to assess households against the planning definition included information on whether households have ever travelled; why they have stopped travelling; the reasons that they travel; and whether they plan to travel again in the future and for what reasons. The table below sets out the planning status of households that were interviewed for the North Somerset GTAA. This includes any hidden households that were identified during the household interviews including concealed and doubled-up households and single adults.

Figure 7 – Planning status of households in North Somerset

Status	Meet Planning Definition	Do Not Meet Planning Definition	Undetermined
Gypsies and Travellers			
Public Sites	13	27	2
Private Sites	32	52	6
Temporary Sites	0	0	0
Tolerated Sites	0	0	0
Unauthorised Sites	5	0	4
Sub-Total	50	79	12
Travelling Showpeople			
Private Yards	5	0	0
Sub-Total	5	0	0
TOTAL	55	79	12

- 7.22 Figure 8 shows that for Gypsies and Travellers in North Somerset, 50 households met the planning definition of a Traveller, and for Travelling Showpeople 5 households met the planning definition in that they were able to demonstrate that household members travel for work purposes, or for seeking work, and stay away from their usual place of residence or have ceased to travel temporarily.
- 7.23 A total of 79 Gypsy and Traveller households did not meet the planning definition as they were not able to demonstrate that they travel away from their usual place of residence for the purpose of work, or that they have ceased to travel temporarily due to children in education, ill health, or old age. Some did travel for cultural reasons, to visit relatives or friends, and others had ceased to travel permanently.

- 7.24 It was not possible to make contact with households on 12 pitches so these households are recorded as Undetermined for the purposes of the GTAA.

Interviews with Gypsies and Travellers in Bricks and Mortar

- 7.25 Despite all of the efforts that were made, it was not possible to identify and interview any households living in bricks and mortar.

Migration/Roadside

- 7.26 The study has also sought to address in-migration (households requiring accommodation who move into the study area from outside) and out-migration (households moving away from the study area). Site surveys typically identify only small numbers of in-migrant and out-migrant households and the data is not normally robust enough to extrapolate long-term trends. At the national level, there is nil net migration of Gypsies and Travellers across the UK, but the assessment has taken into account local migration effects on the basis of the best evidence available.
- 7.27 The study also sought to identify any need from households who have been forced to move from sites due to overcrowding and who are currently living on the roadside or on sites in other local authorities – and who have strong family links with households in North Somerset. These are referred to as roadside households or displaced in-migration.
- 7.28 Evidence drawn from stakeholder engagement and the review of the site baseline has been considered alongside assessments of need that have been completed in other nearby local authorities. The review of the site baseline identified 3 households from outside of North Somerset who were in the process of moving to pitches that have been granted planning permission since the 2017 GTAA. These households are not recorded as components of need from in-migration as they already have planning permission for the pitches there are moving to.
- 7.29 ORS have found no firm evidence from other local studies that have been completed recently of any additional households wishing to move to North Somerset. Therefore, net migration to the sum of zero has been assumed for the GTAA – which means that net pitch requirements are driven by locally identifiable need rather than speculative modelling assumptions.
- 7.30 It is important to note that any applications for new sites or additional pitches as a result of in-migration should be seen as windfall need and should be dealt with by a Criteria-Based Local Plan Policy and will not contribute towards meeting need identified in the GTAA and the 5-year supply.

Public Sites Waiting List

- 7.31 Discussions were held with officers and representatives from a housing association to determine whether there are any households on the waiting lists who are currently in *need* of a pitch. Other than concealed and doubled-up households or adults that are already included as components of need in the GTAA, it was not felt that there is any other outstanding *need* arising from the waiting lists.

Pitch Needs – Gypsies and Travellers that meet the Planning Definition

- 7.32 The 50 Gypsy and Traveller households that met the planning definition were found on 3 of the public sites; 3 of the private sites; and 3 of the unauthorised sites in North Somerset.
- 7.33 Analysis of the household interviews indicated that there is a need for 4 pitches from households on unauthorised developments; 15 pitches from concealed or doubled-up households or single adults; 7 pitches for teenager who will need a pitch of their own in the next 5 years; and 15 pitches as a result of new household formation, using a formation rate of 1.50% derived from the demographics of the residents. There is also supply from a vacant pitch on one of the public sites. Therefore, the overall level of need for those households who met the planning definition of a Gypsy or Traveller **is for 40 pitches** over the GTAA period to 2042, and for 37 pitches over the new Local Plan period to 2038.

Figure 8 – Need for Gypsy and Traveller households in North Somerset that met the Planning Definition (2022-42)

Gypsies and Travellers - Meeting Planning Definition	Pitches

Years	0-5	6-10	11-15	16-17	18-19	20	Total
	2022-26	2027-31	2032-36	2037-38	2039-41	2042	
	25	5	5	2	2	1	40

Pitch Needs – Undetermined Gypsies and Travellers

- 7.34 Whilst it was not possible to determine the planning status of a total of 12 households as they either refused to be interviewed or were not on site at the time of the fieldwork, the needs of these households still need to be recognised by the GTAA as they are believed to be Gypsies and Travellers and may meet the planning definition.
- 7.35 ORS are of the opinion that it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether or not households where an interview was not completed meet the planning definition based on the outcomes of households in that local authority where an interview was completed.
- 7.36 However, data that has been collected from over 5,000 household interviews that have been completed by ORS since the changes to PPTS in 2015 suggests that nationally approximately 30% of households that have been interviewed meet the planning definition.
- 7.37 This would suggest that it is likely that only a proportion of the potential need identified from these undetermined households will need conditioned Gypsy and Traveller pitches, and that the needs of the majority will need to be addressed through other Local Plan policies (as now required by the NPPF).
- 7.38 There were 8 Gypsy and Traveller households where it was not possible to complete an interview. Need for **up to 9 pitches** has been identified from these households plus any concealed adult households or 5-year need arising from teenagers living in these households. This is made up of 4 unauthorised pitches and 5 from new household formation using the ORS national formation rate of 1.50%¹⁴. As set out in above, it is likely that only a proportion of the 8 households will meet the planning definition. If the ORS national average of 30% were to be applied the need identified from undetermined households could be for 3 pitches. If the locally derived proportion of households that met the planning definition (39%) were to be applied this could also be for 4 pitches.
- 7.39 Tables setting out the components of need for undetermined households can be found in **Appendix B**.

Pitch Needs - Gypsies and Travellers that do not meet the Planning Definition

- 7.40 It is not now a requirement for a GTAA to include an assessment of need for households that did not meet the planning definition. However, this assessment is included for illustrative purposes, to help fulfil the requirements of the Housing Act (1985) and the revised NPPF (2021).
- 7.41 On this basis, it is evident that whilst any needs from the households who did not meet the planning definition will represent only a very small proportion of the overall housing need, the Council will still need to ensure that arrangements are in place to properly address these needs – especially as many identified as Irish and Romany Gypsies and may claim that the Council should meet their housing needs through culturally appropriate housing.

¹⁴The ORS *Technical Note on Population and Household Growth (2015)* has identified a national growth rate of 1.50% for Gypsies and Travellers which has been applied in the absence of further demographic information about these households.

- 7.42 There is a need for **65 pitches for households that did not meet the planning definition** over the GTAA period to 2042. This is made up of 17 pitches from concealed or doubled-up households or single adults; 13 pitches for teenagers who will need a pitch of their own in the next 5 years; and 35 pitches as a result of new household formation, using a formation rate of 2.00% derived from the demographics of the residents.
- 7.43 Tables setting out the components of need for households that did not meet the planning definition can be found in **Appendix C**.

Travelling Showpeople Needs

Plot Needs – Travelling Showpeople

- 7.44 There is 1 small Travelling Showmen’s yard in North Somerset. It was possible to complete interviews with all of the households and all met the planning definition.
- 7.45 The GTAA identifies a need for **4 plots for households that met the planning definition** over the GTAA period to 2042. This is made up of 1 teenager in need of a plot of their own in the next 5 years; and 3 from new household formation derived from the household demographics.

Figure 10 – Need for Travelling Showpeople households in North Somerset that met the Planning Definition (2022-42)

	1	0	3	0	0	0	4

Transit Requirements

7.46 When determining the potential need for transit provision the assessment has looked at data from the DLUHC Traveller Caravan Count, the outcomes of the discussions with Council Officers, and records on numbers of unauthorised encampments. As a result of the lockdown and travel restriction due to COVID-19 records of numbers of unauthorised encampments from 2020 and 2021 are felt to be unrepresentative, as is data from the Traveller Caravan Count for this period of time and is therefore not appropriate to use in the determination of transit requirements.

DLUHC Traveller Caravan Count

7.47 Whilst it is considered to be a comprehensive national dataset on numbers of authorised and unauthorised caravans across England, it is acknowledged that the Traveller Caravan Count is a count of caravans and not households. It also does not record the reasons for unauthorised caravans. This makes it very difficult to interpret in relation to assessing future need because it does not count pitches or resident households. The count is also only a twice yearly (January and July) 'snapshot in time' conducted by local authorities on a specific day, and any caravans on unauthorised sites or encampments which occur on other dates are not recorded. Likewise, any caravans that are away from sites on the day of the count are not included. As such it is not considered appropriate to use the outcomes from the Traveller Caravan Count in the assessment of future transit provision. It does however provide valuable historic and trend data on whether there are instances of unauthorised caravans in local authority areas.

7.48 Data from the Traveller Caravan Count shows that there have been relatively low numbers of non-tolerated unauthorised caravans on land not owned by Travellers recorded in the study area in recent years – none in 2016, 11 in 2017 (believed to be a specific event), none in 2018 and 11 in 2019 (believed to be a specific event). Full data for 2021 had not been published at the time of preparing this report.

Stakeholder Interviews and Local Data

7.49 The discussions with Council Officers identified that North Somerset has a more seasonal issue with short-term encampments. The more traditional Gypsy and Traveller population tend to stop over the summer months, primarily for employment opportunities.

7.50 Information held by the Council recorded a total of 14 encampments in 2017, 16 encampments in 2018, and 20 encampments in 2019.

Transit Recommendations

7.51 Due to low numbers of short-term encampments it is not recommended that there is a need for formal transit provision in North Somerset at this time.

7.52 The situation relating to levels of unauthorised encampments should continue to be monitored. As well as information on the size and duration of the encampments, this monitoring should also seek to gather information from residents on the reasons for their stay in the local area; whether they have a permanent base or where they have travelled from; and whether they have any need or preference to settle permanently in the local area. This information could be collected as part of a Welfare Assessment (or similar).

- 7.53 In the short-term the Council should continue to use its current approaches when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements could also be considered.
- 7.54 The term ‘negotiated stopping’ is used to describe agreed short-term provision for Gypsy and Traveller caravans. It does not describe permanent ‘built’ transit sites but negotiated agreements which allow caravans to be sited on suitable specific pieces of ground for an agreed and limited period of time, with the provision of limited services such as water, waste disposal and toilets. Agreements are made between the Council and the (temporary) residents regarding expectations on both sides. See www.negotiatedstopping.co.uk for further information.
- 7.55 ORS also recommend, as part of a strategy to address transit requirements, that the Council engage with neighbouring local authorities to identify what they are currently doing or planning to do to address these needs. Unauthorised encampments are not a problem restricted to North Somerset and this needs to be recognised.
- 7.56 Temporary stopping places can be made available at times of increased demand due to fairs, cultural celebrations and festivals that are attended by Gypsies and Travellers. A charge may be levied as determined by the local authority although they only need to provide basic facilities including: a cold-water supply; portaloos; sewerage disposal point and refuse disposal facilities.

8. Conclusions

- 8.1 This study provides a robust evidence base to enable the Council to assess the housing needs of the Travelling Community as well as complying with their requirements towards Gypsies, Travellers and Travelling Showpeople under the Housing Act 1985, Planning Policy for Traveller Sites (PPTS) 2015, the Housing and Planning Act 2016, the revised National Planning Policy Framework (NPPF) 2021, and Planning Practice Guidance (PPG) 2021. It also provides the evidence base which can be used to support Local Plan Policies.
- 8.2 Whilst the need evidenced at individual sites is not included in this report due to data protection requirements, additional evidence has been provided to the Council to enable them to allocate pitches and to investigate opportunities for the intensification or expansion of sites.

Gypsies and Travellers

- 8.3 In summary there is a need for:
- » 40 pitches in North Somerset over the GTAA period to 2042 for Gypsy and Traveller households that met the planning definition. The need over the Local Plan period to 2038 is for 37 pitches.
 - » 9 pitches in North Somerset for undetermined Gypsy and Traveller households that may meet the planning definition. The need for the Local Plan period to 2038 is for 8 pitches.
 - » 65 pitches in North Somerset for Gypsy and Traveller households who did not meet the planning definition. The need for the Local Plan period to 2038 is for 57 pitches.
- 8.4 In general terms need identified in a GTAA is seen as need for pitches. As set out in Chapter 4 of this report, the now withdrawn *Government Guidance on Designing Gypsy and Traveller Sites* recommended that, as a general guide, an average family pitch must be capable of accommodating an amenity building, a large trailer and touring caravan, parking space for two vehicles and a small garden area.
- 8.5 It is recommended that alternative approaches should be considered when seeking to address the levels of need identified in this GTAA, especially when seeking to meet the need through the intensification or expansion of existing sites.
- 8.6 The first approach to consider is in relation to single concealed or doubled-up adults and teenagers who will be in need of a pitch of their own in the next 5 years. In the short to medium term it is likely that the accommodation need of these individuals could be met through additional touring caravans on existing sites which are, generally, each equivalent to the provision of a pitch, as opposed to more formally set out pitches.
- 8.7 The second approach to consider is for sites occupied by larger extended family groups. Again, sites like this may be able to meet the overall accommodation needs through a combination of shared static caravans, tourers and dayrooms on existing sites which are, generally, each equivalent to the provision of a pitch – as opposed to more formally set out sites with separate pitches. It is common for conditions in Decision Notices for Travellers sites to simply place limits on the numbers and types of caravans as opposed to placing limits on the number of pitches.

- 8.8 Therefore, it is recommended that need for households that met the PPTS planning definition is addressed through new pitch allocations and the intensification or expansion of existing sites – considering some of the alternative approaches set out above. Given that a large proportion of identified need comes from households living on private sites it is likely that it will need to be addressed through the provision of private pitches or sites. In addition, the Council may need to consider new public pitches to meet need identified from public sites.
- 8.9 The Council will also need to carefully consider how to address any needs from any households seeking to move to North Somerset (in-migration), or from any households currently living in bricks and mortar who may wish to move to a site. In terms of Local Plan Policies, the Council should consider the use of a criteria-based policy (as suggested in PPTS).
- 8.10 Regarding need from households that did not meet the planning definition, in general terms, it is the Government’s intention that any need for households who do not fall within the PPTS planning definition should be met as part of general housing need.
- 8.11 It is recognised that the Council is in the process of preparing a new Local Plan that sets out overall housing need. The findings of this report should be considered as part of future housing mix and type within the context of the assessment of overall housing need in relation to Gypsies and Travellers.

Travelling Showpeople

- 8.12 In summary there is a need for:
- » 4 plots in North Somerset over the GTAA period to 2042 for Travelling Showpeople households that met the planning definition. The need for the Local Plan period to 2038 is also for 4 plots.
 - » No plots in North Somerset for undetermined Travelling Showpeople households that may meet the planning definition.
 - » No plots in North Somerset for Travelling Showpeople households who did not meet the planning definition.

Transit Provision

- 8.13 Due to historic low numbers of short-term encampments, it is not recommended that there is a need for a formal public transit site in North Somerset at this time.
- 8.14 In the short-term the Council should continue to use its current approaches when dealing with unauthorised encampments and management-based approaches such as negotiated stopping agreements should be considered.

Appendix A: Glossary of Terms / Acronyms used

Amenity block	A building where basic plumbing amenities (bath/shower, WC, sink) are provided.
Bricks and mortar	Mainstream housing.
Caravan	Mobile living vehicle used by Gypsies and Travellers. Also referred to as trailers.
Concealed household	Households, living within other households, who are unable to set up separate family units.
Doubling-Up	Where there are more than the permitted number of caravans on a pitch or plot.
Emergency Stopping Place	A temporary site with limited facilities to be occupied by Gypsies and Travellers while they travel.
Green Belt	A land use designation used to check the unrestricted sprawl of large built-up areas; prevent neighbouring towns from merging into one another; assist in safeguarding the countryside from encroachment; preserve the setting and special character of historic towns; and assist in urban regeneration, by encouraging the recycling of derelict and other urban land.
Household formation	The process where individuals form separate households. This is normally through adult children setting up their own household.
In-migration	Movement of households into a region or community
Local Plans	Local Authority spatial planning documents that can include specific policies and/or site allocations for Gypsies, Travellers and Travelling Showpeople.
Out-migration	Movement from one region or community in order to settle in another.
Pitch/plot	Area of land on a site/development generally home to one household. Can be varying sizes and have varying caravan numbers. Pitches refer to Gypsy and Traveller sites and Plots to Travelling Showpeople yards.
Private site	An authorised site owned privately. Can be owner-occupied, rented or a mixture of owner-occupied and rented pitches.
Site	An area of land on which Gypsies, Travellers and Travelling Showpeople are accommodated in caravans/chalets/vehicles. Can contain one or multiple pitches/plots.
Social/Public/Council Site	An authorised site owned by either the local authority or a Registered Housing Provider.

Temporary planning permission	A private site with planning permission for a fixed period of time.
Tolerated site/yard	Long-term tolerated sites or yards where enforcement action is not expedient, and a certificate of lawful use would be granted if sought.
Transit provision	Site intended for short stays and containing a range of facilities. There is normally a limit on the length of time residents can stay.
Unauthorised Development	Caravans on land owned by Gypsies and Travellers and without planning permission.
Unauthorised Encampment	Caravans on land not owned by Gypsies and Travellers and without planning permission.
Waiting list	Record held by the local authority or site managers of applications to live on a site.
Yard	A name often used by Travelling Showpeople to refer to a site.

GTAA	Gypsy and Traveller Accommodation Assessment
LPA	Local Planning Authority
DLUHC	Department for Levelling Up, Housing and Communities
NPPF	National Planning Policy Framework
ORS	Opinion Research Services

Appendix E: Household Interview Questions

GTAA Questionnaire 2019

INTERVIEWER: Good Morning/afternoon/evening. My name is < > from Opinion Research Services, working on behalf of XXXX Council.

The Council are undertaking a study of Gypsy, Traveller and Travelling Showpeople accommodation needs assessment in this area. This is needed to make sure that accommodation needs are properly assessed and to get a better understanding of the needs of the Travelling Community.

The Council need to try and speak with every Gypsy, Traveller and Travelling Showpeople household in the area to make sure that the assessment of need is accurate.

Your household will not be identified and all the information collected will be anonymous and will only be used to help understand the needs of Gypsy, Traveller and Travelling Showpeople households.

ORS is registered under the Data Protection Act 1998. Your responses will be stored and processed electronically and securely. This paper form will be securely destroyed after processing. Your household will not be identified to the council and only anonymous data and results will be submitted, though verbatim comments may be reported in full, and the data from this survey will only be used to help understand the needs of Gypsy, Traveller and Travelling Showpeople households

A General Information

A1	Name of planning authority: <i>INTERVIEWER please write in</i>								
A2	Date/time of site visit(s): <i>INTERVIEWER please write in</i>	DD/MM/YY	TIME						
A3	Name of interviewer: <i>INTERVIEWER please write in</i>								
A4	Address and pitch number: <i>INTERVIEWER please write in</i>								
A5	Type of accommodation: <i>INTERVIEWER please cross one box only</i>	Council <input type="checkbox"/>	Private rented <input type="checkbox"/>	Private owned <input type="checkbox"/>	Unauthorised <input type="checkbox"/>	Bricks and Mortar <input type="checkbox"/>

Household Growth Rates

Abstract and Conclusions

1. National and local household formation and growth rates are important components of Gypsy and Traveller accommodation assessments, but until 2013 little detailed work had been done to assess their likely scale. ORS undertook work in 2013 to assess the likely rate of demographic growth for the Gypsy and Traveller population and concluded that the figure could be as low 1.25% per annum, but that best available evidence supports a national net household growth rate of 1.50% per annum.
2. This analysis was produced as a separate document in 2013 and then updated in 2015 (www.opinionresearch.co.uk/formation2015) in light of comments from academics, planning agents and local authorities. The 2015 document was complex because there was still serious dispute as to the level of demographic growth for Gypsies and Travellers in 2015. However, ORS now consider these disputes have largely been resolved at Planning Appeals and Local Plan Examinations, so we consider that much of the supporting evidence is now no longer required to be in the document.
3. This current document represents a shortened re-statement to our findings in 2015 to allow for easier comprehension of the issues involved. It contains no new research and if reader wishes to see further details of the supporting information, they should review the more detailed 2015 report.

Introduction

4. Compared with the general population, the relative youthfulness of many Gypsy and Traveller populations means that their birth rates are likely to generate higher-than-average population growth, and proportionately higher *gross* household formation rates. However, while their *gross* rate of household growth might be high, Gypsy and Traveller communities' future accommodation needs are, in practice, affected by any reduction in the number of households due to dissolution and/or by movements in/out of the area and/or by transfers into other forms of housing. Therefore, the *net* rate of household growth is the *gross* rate of formation *minus* any reductions in households due to such factors.

Modelling Population and Household Growth Rates

5. The basic equation for calculating the rate of Gypsy and Traveller population growth seems simple: start with the base population and then calculate the average increase/decrease by allowing for births, deaths, in-/out-migration and household dissolution. Nevertheless, deriving satisfactory estimates is difficult because the evidence is often tenuous – so, in this context in 2013, ORS modelled the growth of the national Gypsy and Traveller population based on the most likely birth and death rates, and by using PopGroup (the leading software for population and household forecasting). To do so, we supplemented the available national statistical sources with data derived from our own surveys.

Migration Effects

6. Population growth is affected by national net migration and local migration (as Gypsies and Travellers move from one area to another). In terms of national migration, the population of Gypsies and Travellers is relatively fixed, with little international migration. It is in principle possible for Irish Travellers (based in Ireland) to move to the UK, but there is no evidence of this happening to a significant extent and the vast majority of Irish Travellers were born in the UK or are long-term residents.

Population Profile

7. The main source for the rate of Gypsy and Traveller population growth is the UK 2011 Census. The ethnicity question in the 2011 Census included for the first time 'Gypsy and Irish Traveller' as a specific category. While non-response bias probably means that the size of the population was underestimated, the age profile the Census provides is not necessarily distorted and matches the profile derived from ORS's extensive household surveys.

Table 1 - Age Profile for the Gypsy and Traveller Community in England (Source: UK Census of Population 2011)

Age Group	Number of People	Cumulative Percentage
Age 0 to 4	5,725	10.4
Age 5 to 7	3,219	16.3
Age 8 to 9	2,006	19.9
Age 10 to 14	5,431	29.8
Age 15	1,089	31.8
Age 16 to 17	2,145	35.7
Age 18 to 19	1,750	38.9
Age 20 to 24	4,464	47.1
Age 25 to 29	4,189	54.7
Age 30 to 34	3,833	61.7
Age 35 to 39	3,779	68.5
Age 40 to 44	3,828	75.5
Age 45 to 49	3,547	82.0
Age 50 to 54	2,811	87.1
Age 55 to 59	2,074	90.9
Age 60 to 64	1,758	94.1
Age 65 to 69	1,215	96.3
Age 70 to 74	905	97.9
Age 75 to 79	594	99.0
Age 80 to 84	303	99.6
Age 85 and over	230	100.0

Birth and Fertility Rates

8. The table above provides a way of understanding the rate of population growth through births. The table shows that surviving children aged 0-4 years comprise 10.4% of the Gypsy and Traveller population – which means that, on average, 2.1% of the total population was born each year (over the last 5 years). The same estimate is confirmed if we consider that those aged 0-14 comprise 29.8% of the Gypsy and Traveller population – which also means that almost exactly 2% of the population was born each year.
9. The total fertility rate (TFR) for the whole UK population is just below 2 – which means that on average each woman can be expected to have just less than two children who reach adulthood. We know of only one estimate of fertility rates of the UK Gypsy and Traveller community, in *'Ethnic identity and inequalities in*

Britain: The dynamics of diversity by Dr Stephen Jivraj and Professor Ludi Simpson (published May 2015). The authors use the 2011 Census data to estimate the TFR for the Gypsy and Traveller community as 2.75.

10. ORS used our own multiple survey data to investigate the fertility rates of Gypsy and Traveller women. The ORS data shows that on average Gypsy and Traveller women aged 32 years have 2.5 children (but, because the children of mothers above this age point tend to leave home progressively, full TFRs were not completed). On this basis it is reasonable to infer an average of 3 children per woman during her lifetime, which is broadly consistent with the estimate of 2.75 children per woman derived from the 2011 Census.

Death Rates

11. Although the above data imply an annual growth rate through births of about 2%, the death rate has also to be taken into account. Whereas the average life expectancy across the whole population of the UK is currently just over 80 years, a Sheffield University study found that Gypsy and Traveller life expectancy is about 10-12 years less than average (Parry et al (2004) *'The Health Status of Gypsies and Travellers: Report of Department of Health Inequalities in Health Research Initiative'*, University of Sheffield).
12. Therefore, in our population growth modelling we used a conservative estimate of average life expectancy as 72 years – which is entirely consistent with the lower-than-average number of Gypsies and Travellers aged over 70 years in the 2011 Census (and also in ORS's own survey data).

Modelling Outputs

13. If we assume a TFR of 3 and an average life expectancy of 72 years for Gypsies and Travellers, then the modelling, undertaken in PopGroup, projects the population to increase by 66% over the next 40 years – implying a population compound growth rate of 1.25% per annum. If we assume that Gypsy and Traveller life expectancy increases to 77 years by 2050, then the projected population growth rate rises to nearly 1.50% per annum. To generate an 'upper range' rate of population growth, we assumed an implausible TFR of 4 and an average life expectancy rising to 77 over the next 40 years – which then yields an 'upper range' growth rate of 1.90% per annum.

Household Growth

14. In addition to population growth influencing the number of households, the size of households also affects the number. Hence, population and household growth rates do not necessarily match directly, mainly due to the current tendency for people to live in smaller childless or single person households.
15. Because the Gypsy and Traveller population is relatively young and has many single parent households, a 1.25%-1.50% annual population growth could yield higher-than-average household growth rates, particularly if average household sizes fall or if younger-than-average households form. However, while there is evidence that Gypsy and Traveller households already form at an earlier age than in the general population, the scope for a more rapid rate of growth, through even earlier household formation, is limited.
16. Based on the 2011 Census, the table below compares the age of household representatives in English households with those in Gypsy and Traveller households – showing that the latter has many more household representatives aged under-25 years. In the general English population 3.60% of household representatives are aged 16-24, compared with 8.70% in the Gypsy and Traveller population. ORS's survey data shows that about 10% of Gypsy and Traveller households have household representatives aged under-25 years.

Table 2 - Age of Head of Household (Source: UK Census of Population 2011)

Age of household representative	Number of households - England	Percentage households - England	Number of households – Gypsy and Traveller	Percentage households – Gypsy and Traveller
Age 24 and under	790,974	3.6%	1,698	8.7%
Age 25 to 34	3,158,258	14.3%	4,232	21.7%
Age 35 to 49	6,563,651	29.7%	6,899	35.5%
Age 50 to 64	5,828,761	26.4%	4,310	22.2%
Age 65 to 74	2,764,474	12.5%	1,473	7.6%
Age 75 to 84	2,097,807	9.5%	682	3.5%
Age 85 and over	859,443	3.9%	164	0.8%
Total	22,063,368	100%	19,458	100%

17. The following table shows that the proportion of single person Gypsy and Traveller households is not dissimilar to the wider population of England; but there are more lone parents, fewer couples without children, and fewer households with non-dependent children amongst Gypsies and Travellers

Table 3 - Household Type (Source: UK Census of Population 2011)

Household Type	Number of households - England	Percentage households - England	Number of households – Gypsy and Traveller	Percentage households – Gypsy and Traveller
Single person	6,666,493	30.3%	5,741	29.5%
Couple with no children	5,681,847	25.7%	2345	12.1%
Couple with dependent children	4,266,670	19.3%	3683	18.9%
Couple with non-dependent children	1,342,841	6.1%	822	4.2%
Lone parent: Dependent children	1,573,255	7.1%	3,949	20.3%
Lone parent: All children non-dependent	766,569	3.5%	795	4.1%
Other households	1,765,693	8.0%	2,123	10.9%
Total	22,063,368	100%	19,458	100%

18. The key point, though, is that since 20% of Gypsy and Traveller households are lone parents with dependent children, and up to 30% are single persons, there is limited potential for further reductions in average household size to increase current household formation rates significantly – and there is no reason to think that earlier household formations or increasing divorce rates will in the medium term affect household formation rates. While there are differences with the general population, a 1.25%-1.50% per annum Gypsy and Traveller population growth rate is likely to lead to a household growth rate of 1.25%-1.50% per annum

Summary Conclusions

19. The best available evidence suggests that the net annual Gypsy and Traveller household growth rate is 1.50% per annum. Some local authorities might allow for a household growth rate of up to 2.50% per annum, to

provide a 'margin' if their populations are relatively youthful; but in areas where on-site surveys indicate that there are fewer children in the Gypsy and Traveller population, lower estimates should be used.

20. The outcomes of this Technical Note can be used to provide an estimate of local new household formation rates by adjusting the upper national growth rate of 1.50% based on local demographic characteristics.
21. In addition, in certain circumstances where the numbers of households and children are higher or lower than national data has identified, or the population age structure is skewed by certain age groups, it may not be appropriate to apply a percentage rate for new household formation. In these cases, a judgement should be made on likely new household formation based on the age and gender of the children identified in local household interviews. This should be based on the assumption that 50% of households likely to form will stay in any given area and that 50% will pair up and move to another area, while still considering the impact of dissolution. This is based on evidence from over 140 GTAA's that ORS have completed across England and Wales involving over 4,300 household interviews.
