Hi Sian,

Based on the actuator size and spec in the pictures I would say 10k to supply and install 1 actuator would be about right.

Hi Sam

Thank you for your quick reply.

I have attached photos of the existing sluice gate that has been automated using Rotork equipment. Hopefully, you are able to work out the size and spec from these? We are now looking for an estimate to automate the second sluice gate in the same location.

Do you think £10-20k would cover all work required to supply and install the actuator and remote controls to fully automate the second sluice gate?

Thank you

Kind regards,  
Sian

Good morning Sian,

It very much depends on the size of the gate and the set up but as a very rough estimate I would say £10-20k however it could be slightly more or slightly less depending on everything.

If you need any more assistance we can arrange for the local sales engineer nip in to go through with you can provide a more accurate quotation.

### **Enquiry**

Good afternoon

Would it be possible to get an idea of cost to automate a tilting weir sluice please? We are just looking for a very high level 'ball-park' figure at this stage (eg. In the region of £10k, £50k, £100k etc). Would Rotork be able to provide this approximate figure please?

Kind regards, Sian Ellis

Thanks,

Rotork
