

Kindaco LTD - Kinda Co.

The Rural England Prosperity Fund grant enabled KindaCo, a dairy-free cheese company, to purchase a large industrial blender.

This crucial piece of equipment has served as a catalyst for innovation within the company. With the industrial blender now in operation, KindaCo is expanding its business and developing a diverse range of new products to market.

Previously the lack of such equipment limited the company's ability to innovate, but with this cutting-edge technology, KindaCo has overcome previous production constraints. This enhances their market presence, improves their contribution to the local business economy of North Somerset and benefits their five local employees. The project has provided the team with long-term job opportunities, improving their livelihoods, and supporting their families.
