

Mendip Activity Centre

Mendip Activity Centre has revitalized 1.2 acres of land, supported by their REPF grant. This investment has enabled the creation of diverse new facilities to enhance year-round functionality and accessibility.

The project features 2,400 square feet of indoor space for activities and events, a covered picnic area and two shelters for outdoor gatherings. The covered target sports zone has four ranges and enables people to participate in a range of sports whatever the weather.

The money has also contributed towards groundworks, ensuring wheelchair-friendly paths for accessibility across the new area. Additionally secure storage areas were established to improve the safe and efficient handling of equipment.

These developments have transformed the centre into a more inclusive and versatile venue, increasing its ability to host various activities and accommodate more visitors throughout the year, boosting the local visitor economy.
