

The Groundwork South Trust Limited

Goblin Combe for a Sustainable Future successfully applied for a REPF grant towards refurbishment of their toilet facilities in September 2023.

The money contributed towards the refurbishment of Goblin Combe's toilet blocks plumbing and waste systems and towards the electrical system of the block. Prior to the project the building was an empty shell, closed to the public. The improved toilet provision should increase visitor numbers and improve perception of the facilities at this rural location. It enhances the site and as well as providing positive impacts for rural communities enhancing the impact of Goblin Combe's charitable initiatives and benefiting the local rural economy.
