

Weston & District Community Transport – 'Feasibility, Space, and Design'

Weston and District Community Transport (WDCT) is a not-for-profit organisation which provides door-to-door transport for the elderly, disabled, and less advantaged residents of Weston-super-Mare and its surrounding area at a price affordable to all.

The organisation has outgrown its current site of operations and utilised UKSPF funding to help fund a feasibility study into a new site. This study established what WDCT would need from a new site (e.g. size, location, access etc.) and proposed some preliminary designs. All this information will then help WDCT to be clear what size and type of land they need to facilitate their continued growth.
