

STATEMENT OF REASONS

NORTH SOMERSET COUNCIL

NAILSEA (OFF STREET PARKING PLACES) CONSOLIDATION ORDER 2025

North Somerset Council proposes to introduce parking charges to additional car park sites. The proposals aim to provide well managed and well maintained parking facilities that support local economies, responds to climate challenges and uphold healthy communities.

The introduction of parking charges to additional sites will allow the council to continue providing parking facilities and help to mitigate cuts to essential statutory duty services.

The proposed parking charges recognise the nature of local areas and the people that use the parking facilities currently. They are designed to minimise impact on local businesses and economy whilst ensuring that residents can access services and facilities at minimal cost. The proposals are designed to ensure adequate turnover in parking spaces to support local businesses as housing growth expands our communities and increases the pressure on spaces available.
